

USB cable update on Main-page (Single)

1. Copy all the files from PC to Smart POS via a USB cable
(Please make sure you set your terminal as a “Media device”, so that your PC can find the terminal internal storage.)
2. Click the UP arrow icon and then click “Local update”
3. Choose the file you want to update
4. Click the button of Start install
5. Device will restart instantly to install the package
6. You can install another one package after restarting
